

# ENERGY RESOURCE CENTER

A Sempra Energy utility®

2010 Seminar Flier

## Technology Advancement Strategies for Engine Emissions Control

### Who should attend:

- Engine owners and operators
- Engine testing and maintenance providers
- Facility and equipment engineering and operations staff
- Environmental compliance staff

### Attend if you want to:

- Learn about advances in air-to-fuel ratio control.
- Hear about an exhaust sensor based tool that predicts catalyst life.
- Learn about new packaged (with emission controls) rich and lean-burn engine systems.

Thursday,  
September 23  
(Seminar #23525)

Time: 9 a.m. - 3 p.m.

(8:30 a.m. check-in and continental breakfast. Lunch provided.)

Cost: Free

### Location:

Southern California Gas Company's Energy Resource Center  
9240 Firestone Blvd.  
Downey, CA 90241

## Advancements in engine emissions control technologies and strategies facilitate better and more continuous compliance in regard to existing stringent air-quality requirements

Learn about new advancements in engine emissions control technology and strategies. Hear about a new oxygen sensor that can be retrofitted onto existing air-to-fuel ratio controllers that address all sensor deficiencies enabling continuous compliance. Listen to presentations discussing a new NO<sub>x</sub> sensor-based catalyst degradation technology that can predict when the catalyst will need maintenance or replacement before compliance becomes an issue. A new air-to-fuel ratio controller that can provide more stable control which enhances emissions control. Hear about new packaged engine systems that include emissions control equipment and strategies providing one-stop solutions. Visit with vendors and see the latest control products available.

Southern California Gas Company is offering these seminars as part of our ongoing commitment to provide our business customers with exceptional service and to promote energy efficiency.

### Learn from experts:

Hear from experts, technical advisers, and end users who are responsible for regulatory affairs, site testing, and day-to-day system operations.

This program is funded by California utility customers and administered by Southern California Gas Company under the auspices of the California Public Utilities Commission. California consumers are not obligated to purchase any product or service mentioned in these programs.

If you have specific questions regarding our energy-efficiency programs and related rebates, contact your representative from Southern California Gas Company or call 1-800-GAS-2000. For information on exhibiting and/or speaking opportunities, please call 1-562-803-7453.
