

MANAGER OF TECHNICAL SERVICES

To \$192,961

Excellent Benefits

**Final Filing Date:
September 3, 2013**

The District and the Position

Union Sanitary District collects and treats wastewater for the cities of Fremont, Newark, and Union City, California, has an operating budget of \$31M and a 10-year CIP budget of \$200M, and a staff of 135. Reporting to the General Manager, the Manager of Technical Services is a key member of the management team, overseeing an organization of 32 professional, technical, and administrative staff.

Required Qualifications

- Bachelor's degree (ABET accredited) in Civil or Environmental Engineering or a related field, registration as a Professional Civil Engineer
- Ten + years of increasingly responsible professional engineering experience and five years supervising or directing the work of others in a wastewater or water utility, engineering consulting firm, or environmental-related organization.

The Ideal Candidate Will Demonstrate:

- Proven ability to oversee Capital Improvement programs and projects, Master Planning, and Environmental Documentation (CEQA); excellent project management skills
- Ability to respond to issues quickly and make sound decisions
- Understanding of SF Bay Area wastewater policy and regulatory issues
- Experience working effectively and collaboratively with O & M staff
- Ability to work effectively in, and foster a collaborative work culture
- Customer focus and the values of honesty and integrity; good stewardship of public funds and the infrastructure
