

Save-the-Date: Climate Adaptation Training Workshop

April 1st & 2nd, 2015

Los Angeles, California

FREE ~ Sponsored by US EPA

US EPA's Climate Ready Water Utilities (CRWU) initiative is pleased to be offering an interactive training workshop on the Climate Resilience Evaluation and Awareness Tool ([CREAT](#)) for the water sector. Drinking water, wastewater and stormwater utility operators are encouraged to attend. Participants will download the CREAT software onto their laptops and engage in hands-on training to:

- Identify climate change threats to water utility operations;
- Assess potential system vulnerabilities; and
- Evaluate climate adaptation options.

Participants will have an opportunity to develop a working CREAT file and gain a head start toward becoming more resilient. An official invitation with a registration link will be circulated in early February.

Day 1	Day 2
Introduction to CRWU Tools & Resources	CREAT Training: Interactive Session
Regional Climate Variability & Impacts	Applying CREAT Results to Utility Decision Making
Introduction to CREAT	Identifying Adaptation Measures
CREAT Training: Interactive Session	Plenary Discussion: Funding Sources & Strategies
