### ***You'll learn...***

- More in depth information about the top most challenging Elements 4, 5 & 9 (the Map, Maintain Measure and Modify) of the SSMP.
- Understand the importance of mapping your system and updating and/or reconfiguring maps for reactionary response.
- Tips on using maps for preventative maintenance
- How to get started on developing a budget

### ***What You'll Take Away...***

- Reference manual to use and update with your agency's SSMP progress
- Access to updates and information on additional training
- Access to a Yahoo group of attendees and subject matter experts

Brought to you by CWEA, SCAP,  
BACWA, CASA, CVCWA.

CWEA has worked with Subject Matter Experts and the State Water Resources Control Board in an effort to provide accurate, complete, and reliable information regarding SSO WDR electronic reporting. CWEA provides no warranty, expressed or implied, nor assumes any legal liability or responsibility for the accuracy, reliability, or completeness of furnished information. While it is our intention to provide training to help you and your agency comply with the SSO WDR, CWEA provides no warranty, expressed or implied, that attending this training and/or using the reference guide and/or database simulation will result in your agency's successful compliance with the SSO WDR. The information provided is not intended to take the place of either the written law or regulations.

**SSMP: MAP, MAINTAIN, MEASURE & MODIFY**

The California Water Environment Association (CWEA) and its Summit Partners (CASA, BACWA, SCAP, CVCWA) announce the second of the SSO-WDR Compliance Workshops entitled **Map, Maintain, Measure and Modify - Part 2 of the New Regulations for Collection Systems: Do you know what an SSMP is?**

With the new GWDR in full effect and electronic reporting live, come and learn more about the next requirement — Sewer System Management Plans.

In the session you'll learn in more in detail about the 3 most challenging SSMP requirements. You will have the opportunity to work on case studies scenarios and speak directly with subject matter experts. Each attendee will receive a reference manual written by a team

of industry subject matter experts and reviewed and approved by the State Water Board. This manual will give you and your agency background and tools to help you comply with the SSMP requirement. This manual was also designed specifically to focus on Elements 4, 5 and 9 which are the Map, Maintain, Measure & Modify portions of the SSMP.

The workshop is not designed to have plans completed at the end of the day.

This workshop is specifically designed for those involved in the development of Sewer System Management Plans in California's collection systems. The session will use the latest techniques in adult learning and includes group exercises and work.
