**OVERVIEW:** Wastewater from more than 10,000 homes and businesses reaches the Mt. View Sanitary District Wastewater Treatment plant through 73 miles of collections pipeline. Mt. View Sanitary District's wastewater treatment plant provides advanced secondary level treatment which includes sand filtration and ultraviolet disinfection for approximately 1.25 million gallons per day (mgd) of domestic and commercial wastewater. The District serves a population of approximately 21,900. The District manages 151 acres of constructed and natural marshland and the treatment plant effluent is entirely reclaimed to the wetland as an environmental benefit.
