Footnotes:

- [1] Load targets may not exactly compute from current performance values due to rounding. Calculations were completed prior to rounding. When comparing load targets and measured loads, measured loads will first be rounded in the same manner as the load targets.
- [2] The current performance includes total inorganic nitrogen loads to the Hayward Marsh.
- [3] The Discharger is prohibited from discharging during the dry season. The dry season discharge prohibition period is defined in its individual NPDES permit as listed in Attachment B.
