Background

This Guide was originally prepared in 2015 by Whitley Burchett & Associates under contract with the Bay Area Clean Water Agencies and under the direction of the BACWA Recycled Water Committee. The Guide was prepared in response to inquiries of commercial recycled water truck fill facilities in the Bay Area.

The Guide was updated in 2021 by BACWA staff with guidance from the Recycled Water Committee. It is the Recycled Water Committee's intention to update this Guide at regular intervals. If you see any information that should be updated, have a facility to add to this Guide, or have any questions please email info@bacwa.org.

Disclaimer

The intent of this Guide is to provide prospective water haulers with general information regarding the location of Bay Area recycled water commercial truck fill facilities, permit requirements, and associated fees for recycled water. Information in this Guide represents data collected in August and September 2021. Please contact agencies directly for current information.

Cover Photos

Top row:  East Bay Municipal Utility District
Bottom row from left to right:  City of Palo Alto, City of Santa Rosa

Acknowledgements

This Guide was prepared in conjunction with the BACWA agencies. The time spent by agencies providing program information and review of this document is greatly appreciated.

Electronic Version

The BACWA Truck Fill Guide is available on the BACWA website at http://bacwa.org.

### Additional Access Information

- Required: Required to check in and check out.

### Training

- **Required**: Yes
- **Who**: Truck Owner, Truck Driver, and Customer using water
- **Schedule**: By Appointment
- **Duration**: 1 hour less
- **Frequency**: Once per permit
- **Location**: Water Pollution Control Plant
- **Length of time to become authorized truck hauler**: 10 business days

### Signage

- **Area Use Signage Required**: Yes
- **Vehicle Signage Required**: Yes
- **Signs Provided by Water Agency**: No
- **Signs Provided by Water Agency**: Yes (First set only)

### Vehicle Inspection

- **Required**: Yes
- **Duration**: 1 hour or less
- **How to schedule**: Appointment
- **Inspection Location**: Water Pollution Control Plant
- **Re-inspection Required**: Once with training, plus visual observation during each visit

### Fees

- **Water**: $4.44 per CCF (FY22)
- **Connection Device**: No Charge
- **Vehicle Signage**: No charge for first set
- **Other**: Use Area Signage: User provides
- **Training**: No Charge
- **Permit**: No Charge

This summary is prepared from the December 2, 2000-adopted Title 22 Water Recycling Criteria and supersedes all earlier versions. Prepared by Bahman Sheikh and edited by EBMUD Office of Water Recycling, who acknowledge this is a summary and not the formal version of the regulations referenced above.

1 Refer to the full text of the December 2, 2000 version of Title 22: California Code of Regulations, Chapter 3 Water Recycling Criteria. This chart is only an informal summary of the uses allowed in this version, with the exception of orchards and vineyards noted as "Not Allowed" on page 1 and explained below.

2 Per California Department of Public Health letter of January 8, 2003 to California Regional Water Quality Control Boards.

3 Allowed with "conventional tertiary treatment." Additional monitoring for two years or more is necessary with direct filtration.

4 Drift eliminators and/or biocides are required if public or employees can be exposed to mist.

5 Refer to Groundwater Recharge Guidelines, available from the California Department of Public Health.
