

SANITARY SEWER SYSTEMS WASTE DISCHARGE REQUIREMENTS ORDER

WEDNESDAY, JANUARY 11TH 9 A.M. TO 12:30 P.M.

On January 11, 2023, the Clean Water Summit Partners will host a free Zoom webinar on the reissued statewide Sanitary Sewer Systems Waste Discharge Requirements (Order) that the State Water Resources Control Board adopted on December 6, 2022. The requirements in the reissued statewide General Order become effective on June 5, 2023. This event is designed specifically for collection system LROs, data submitters, managers and operators to understand:

The streamlined process for existing enrollees to transfer current Order enrollment to the reissued Order, available from April 4 through June 4, 2023, prior to the reissued Order becoming effective;

The priority actions to comply with modified spill reporting and updated Spill Emergency Response Plan requirements by June 2023;

Clarifications for updating Sewer System Management Plans in 2025 and 2026, based on the current Plan update schedules in the existing Order.

Registration Required:
