RE: Bid 08-2024 Hydrofluosilicic Acid

Dear Jennifer,

Please be advised I was just informed that the prices we submitted on the above-mentioned bid were entered as a "per wet ton" unit of measure instead of "per gallon". Please find below the correct unit of measure pricing.

Proper conversion is: Wet ton price / 2000 = wet lb price x 10.2 ppg = per gallon price.

Lot 1 - East Bay - \$647/wet ton = \$3.30/gallon
Lot 2 - Marina Sonoma Napa - \$624.00/wet ton = \$3.18/gallon
Lot 3 - North Bay - \$597.00/wet ton = \$3.04/gallon
Lot 4 - Sacramento - \$577.00/wet ton = \$2.94/gallon
Lot 5 - Tri Valley - \$597.00/wet ton = \$3.04/gallon

Please note, the additional comments submitted with the bid for 2 locations still stand. We apologize for inconvenience and appreciate your review.

If you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

Sarah Duffy
