

# District Permit Application Review

Presented by Sanjeev Kamboj • BACWA-BAAQMD WG • January 13, 2025

# Permit Application Process

- General facility form and source specific data form(s)
- Maps identifying equipment location
- Additional equipment specifications
  - Material safety data sheets (MSDS)
  - Emission certifications
  - Manufacturers specifications
- CEQA-related information
- Verify that sufficient information has been submitted in order to determine compliance

Application Submittal

# Permit Application Process

- All required data forms/worksheets
- All required fees paid
- All information needed to calculate emissions, including toxics, from proposed source(s)

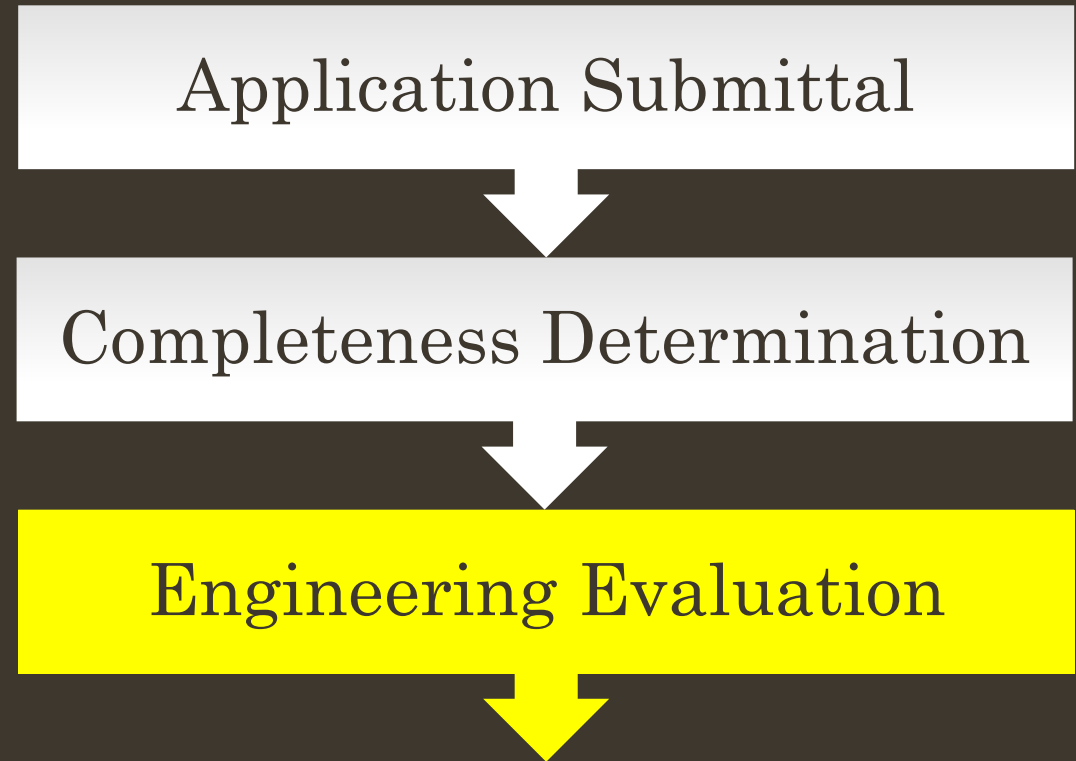

Application Submittal

Completeness Determination

# Permit Application Process

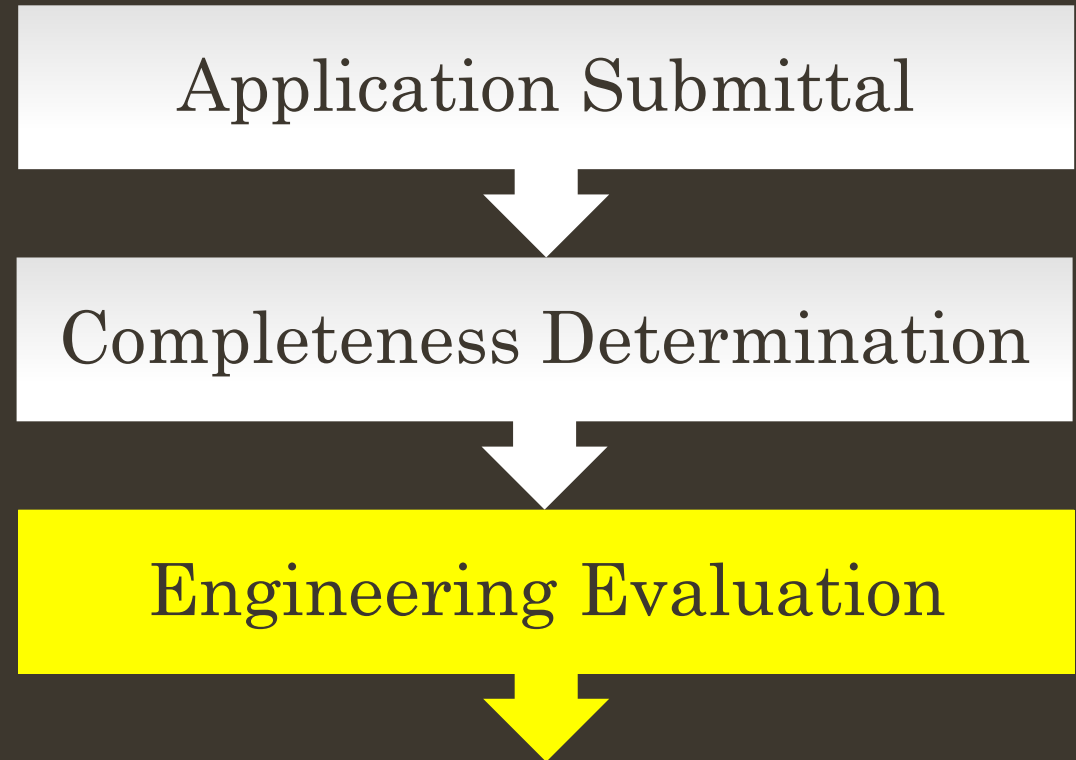

- New Source Review (NSR) – Regulation 2-2
  - Best Available Control Technology (BACT)
  - Offsets
- NSR for Toxic Air Contaminants – Regulation 2-5
  - Health Risk Assessment
- General Requirements – Regulation 2-1
  - Public Notice
  - California Environmental Quality Act (CEQA)

# Permit Application Process

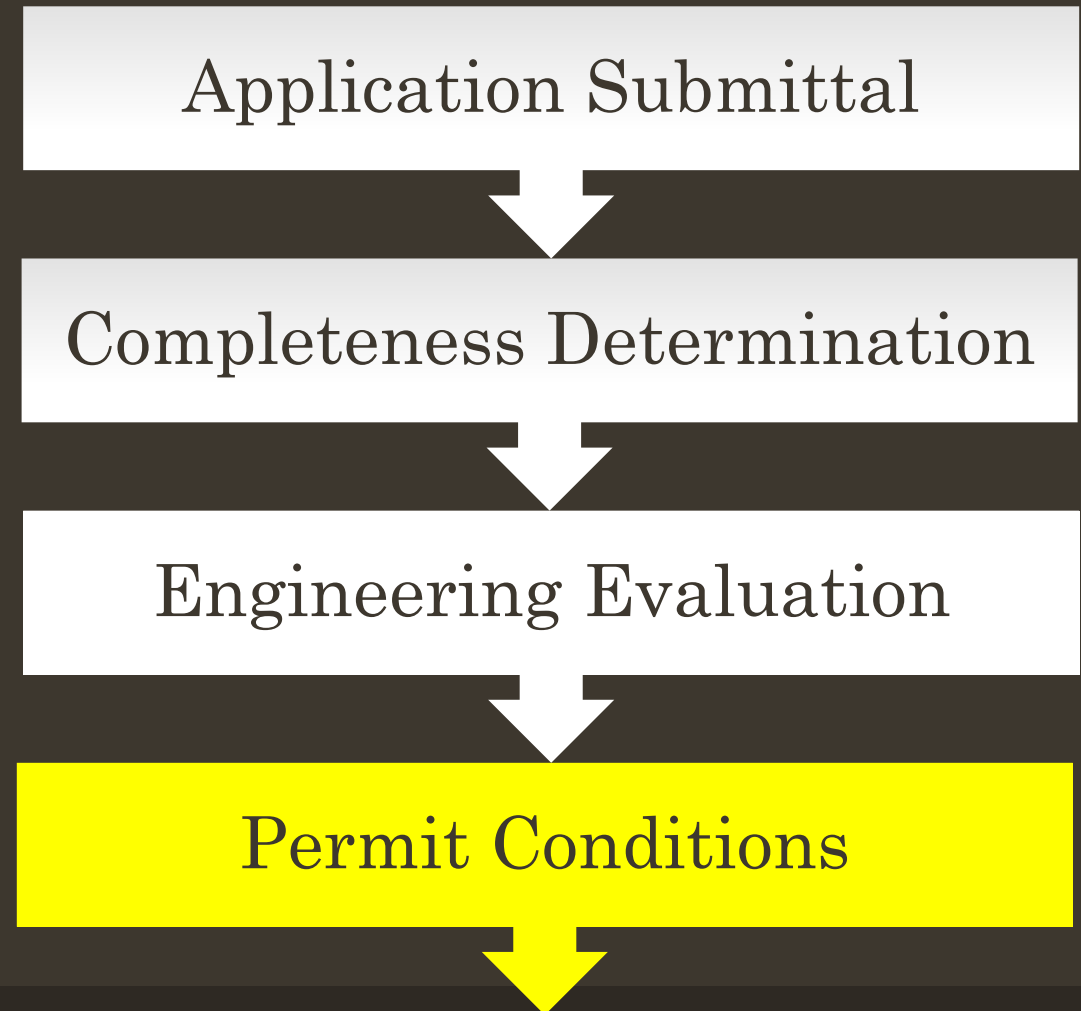

- Source/Category Specific Rules – Regulations 6 and 8 through 12
- State Requirements
  - Air Toxic Control Measures
- Federal Requirements
  - New Source Performance Standards (NSPS)
  - National Emission Standards for Hazardous Air Pollutants (NESHAPs)

# Permit Application Process

- Permit conditions fall under 4 general categories:
  - Limits (throughput, emissions, usage, etc...)
  - Operational Requirements
  - Monitoring Requirements
  - Reporting/Recordkeeping Requirements
- Conditions should clearly outline operating requirements to all stakeholders, including:
  - Permit holder
  - Inspectors

# Application Approval and Permit Issuance

# Finalizing and Issuing Permits

- Issue Authority to Construct (AC)
  - To give the applicant permission to construct and/or operate a piece of equipment
  - Valid for 2 years initially. Can be extended upon request.
  - Operator submits startup notification at least 7 days before scheduled initial operation
- Convert AC to Permit to Operate (PO)
  - Once all AC requirements have been met, the AC is converted to a PO, which will be valid for 1 year before requiring renewal.
- Waive AC
  - If equipment has been installed prior to application approval, the AC will be waived and a PO will be issued.

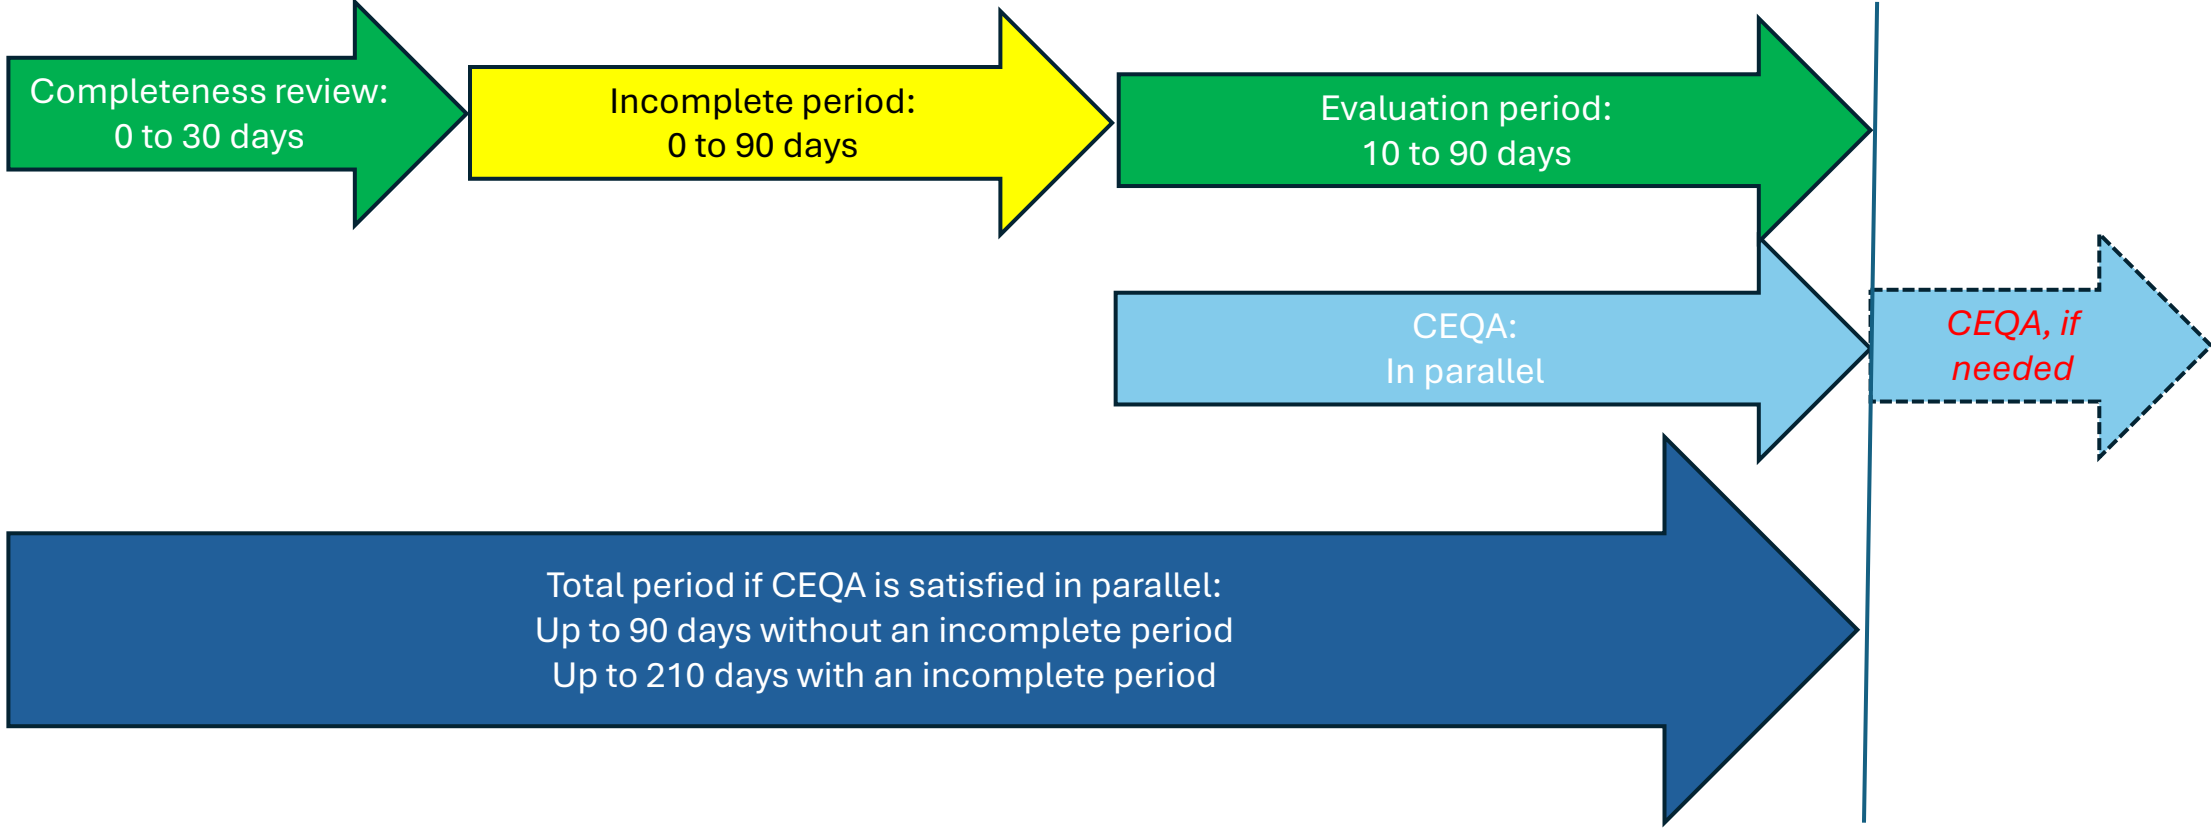

Questions?

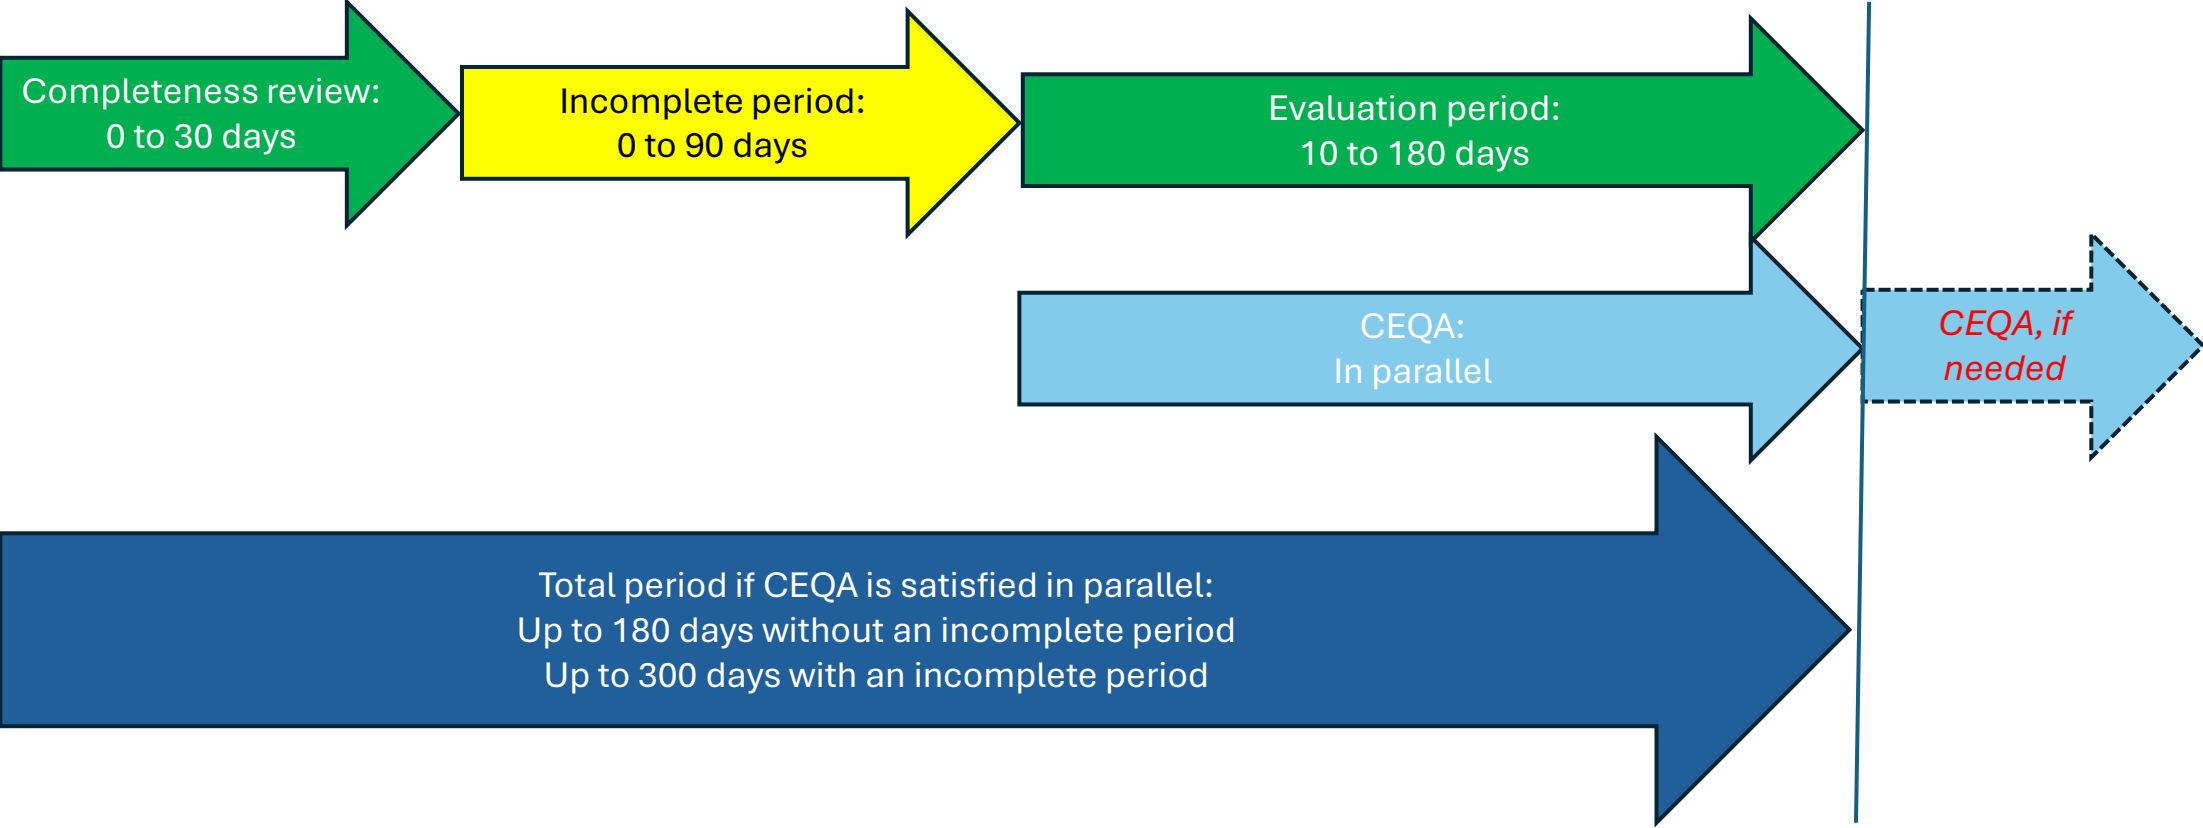

# Permit Application Timeline: Standard

	Air District
	Applicant

\*The Air District cannot issue a permit until compliance with CEQA is satisfied.

# Permit Application Timeline: Requires public notice or Title V facilities

	Air District
	Applicant

\*The Air District cannot issue a permit until compliance with CEQA is satisfied.
