Attn: FY 2026 San Francisco Bay Geographic Program Office Proposal Review Committee

Subject: Support from the City of Sunnyvale for BACWA's Clean Water Together proposal

Dear San Francisco Bay Geographic Program Office Proposal Reviewer,

On behalf of the City of Sunnyvale, I am writing to express our strong support of the proposal titled "Clean Water Together – A Coalition Proposal for Regional Nutrient Solutions" submitted by BACWA, with partners at the San Francisco Estuary Partnership, East Bay Municipal Utility District, Central Contra Costa Sanitation District, East Bay Dischargers Authority, Dublin San Ramon Services District, the City of South San Francisco, Mt. View Sanitary District, Sanitation Agency of Southern Marin, City of Burlingame, in response to the EPA's Notice of Funding Opportunity Number: EPA-R9-SFBay-26-0. As a region, we are at a critical juncture in protecting the San Francisco Bay, and this collaborative effort represents a viable and timely path toward sustainable nutrient management.

Through on-the-ground implementation, targeted research, regional collaboration, and the development of a nutrient trading program, this work will enable publicly owned treatment works (POTWs) to leverage site-specific opportunities while contributing to broader, system-wide nutrient and contaminant management strategies. We believe this collaboration will generate valuable, transferable insights beyond the immediate project areas and inform practical, scalable approaches to wastewater nutrient management across the Bay Area and nationally.

The City of Sunnyvale owns and operates the Sunnyvale Water Pollution Control Plant (WPCP), an advanced wastewater treatment facility serving residents and businesses in the community and portions of the surrounding area. The WPCP provides secondary treatment with nutrient removal and discharges treated effluent to the South Bay of the San Francisco Bay under its National Pollutant Discharge Elimination System (NPDES) permit issued pursuant to

the Clean Water Act. As a South Bay discharger, Sunnyvale plays a key role in regional nutrient management efforts aimed at protecting water quality and ecological health in the Estuary. Participation in this project will provide valuable technical, regulatory, and implementation insights into process intensification, nature-based solutions, and market-based strategies that can inform future upgrades at the WPCP, support compliance with evolving nutrient requirements, and enhance the City's ability to manage nutrients and contaminants of emerging concern in a cost-effective and environmentally responsible manner.

We are particularly supportive of the diverse approaches outlined in the proposal, which include:

- **Process Intensification:** Piloting advanced technologies like Membrane Aerated Bioreactors (MABR) and Densified Activated Sludge (DAS) to reduce nutrients within existing plant footprints, achieving nutrient reductions more efficiently and more quickly than would otherwise be possible without this funding.
- **Nature-Based Solutions (NBS):** Advancing projects such as the "First Mile" Horizontal Levee and floating wetland islands to provide nutrient polishing, support reduction of CECs from RO Concentrate (ROC) and other similar waste streams prior to discharge to the San Francisco Bay, and deliver co-benefits including habitat enhancement, shoreline resilience, and flood protection.
- **Market-Based Solutions:** Developing a regional nutrient trading program that leverages site-specific opportunities to achieve aggregate load reductions more efficiently

The City of Sunnyvale recognizes BACWA's long-standing history of successful regional coordination and fiscal responsibility. Their collaboration with the San Francisco Estuary Partnership (SFEP) ensures robust administrative oversight and effective technology transfer across the region. We are confident that this coalition will deliver high-impact results that serve as a national model for watershed-scale nutrient management.

The City of Sunnyvale fully supports this collaborative effort to protect our Estuary while practicing economic efficiency with the co-benefits of drought and flooding resilience. We urge the EPA to fund this proposal and support the regional collaboration necessary for a sustainable San Francisco Bay. If you have any questions, please contact me at [mnasser@sunnyvale.ca.gov](mailto:mnasser@sunnyvale.ca.gov) or 408-730-7740.

Sunnyvale

Sincerely,

Mansour Nasser (Feb 25, 2026 16:40:46 PST)

02/25/2026

Mansour Nasser,  
Assistant Director of Environmental Services
