Attn: 2026 San Francisco Bay Geographic Program Office Proposal Review Committee

Subject: Support from Dublin San Ramon Services District for BACWA's Clean Water Together Proposal

Dear San Francisco Bay Geographic Program Office Proposal Reviewer,

On behalf of the Dublin San Ramon Services District, I am writing to express our strong support of the proposal titled "Clean Water Together – A Coalition Proposal for Regional Nutrient Solutions" submitted by BACWA, with partners at the San Francisco Estuary Partnership, East Bay Municipal Utility District, Central Contra Costa Sanitation District, East Bay Dischargers Authority, Dublin San Ramon Services District, the City of South San Francisco, Mt. View Sanitary District, Sanitation Agency of Southern Marin, City of Burlingame, in response to the EPA's Notice of Funding Opportunity Number: EPA-R9-SFBay-26-0. As a region, we are at a critical juncture in protecting the San Francisco Bay, and this collaborative effort represents a viable and timely path toward sustainable nutrient management.

Through on-the-ground implementation, targeted research, regional collaboration, and the development of a nutrient trading program, this work will enable publicly owned treatment works (POTWs) to leverage site-specific opportunities while contributing to broader, system-wide nutrient and contaminant management strategies. We believe this collaboration will generate valuable, transferable insights beyond the immediate project areas and inform practical, scalable approaches to wastewater nutrient management across the Bay Area and nationally. We respectfully request your support for this important initiative.

Dublin San Ramon Services District (DSRSD) serves approximately 194,600 residents in Dublin, San Ramon, and, by contract, Pleasanton. The District operates three primary enterprises: local wastewater collection in Dublin and southwest San Ramon; regional wastewater treatment and disposal for Dublin, southwest San Ramon, and Pleasanton through a contractual partnership; and potable water service for Dublin and the Dougherty Valley area of San Ramon.

As a sub-awardee under the Bay Area Clean Water Agencies (BACWA) Clean Water Together proposal, DSRSD shares the regional objective of reducing nutrient loads to San Francisco Bay. The District supports the Central Contra Costa Sanitation District's demonstration scale Membrane Aerated Bioreactor (MABR) facility, which incorporates complementary densified activated sludge (DAS) technology. This project offers opportunities for coordinated research, operational learning, and technology evaluation. DSRSD anticipates that the knowledge developed through this demonstration effort will inform future nutrient reduction initiatives within our service area and support broader regional water quality goals.

We are particularly supportive of the diverse approaches outlined in the proposal, which include:

- **Process Intensification:** Piloting advanced technologies like Membrane Aerated Bioreactors (MABR) and Densified Activated Sludge (DAS) to reduce nutrients within existing plant footprints, achieving nutrient reductions more efficiently and more quickly than would otherwise be possible without this funding.
- **Nature-Based Solutions (NBS):** Advancing projects like the "First Mile" Horizontal Levee and floating wetland islands to provide nutrient polishing alongside habitat enhancement and flood resilience.
- **Market-Based Solutions:** Developing a regional nutrient trading program that leverages site-specific opportunities to achieve aggregate load reductions more efficiently

Dublin San Ramon Services District recognizes BACWA's long-standing history of successful regional coordination and fiscal responsibility. Their collaboration with the San Francisco Estuary Partnership (SFEP) ensures robust administrative oversight and effective technology transfer across the region. We are confident that this coalition will deliver high-impact results that serve as a national model for watershed-scale nutrient management.

Dublin San Ramon Services District fully supports this collaborative effort to protect our Estuary while practicing economic efficiency with the co-benefits of drought and flooding resilience. We urge the EPA to fund this proposal and support the regional collaboration necessary for a sustainable San Francisco Bay. If you have any questions, please contact me at dgill@dsrsd.com or (925) 875- 2345.

Sincerely,

Dan Gill
Operations Director
Dublin San Ramon Services District
